

Covering the world of football, in the greatest detail

A PERFORM GROUP COMPANY

Opta offers a wide variety of data feeds and these are split into three different tiers, depending on the level of detail - Core Data, Classic Data and Performance Data.

Opta's Classic and Performance data feeds represent the most detailed live sports information available.

Opta provides the most definitive data for every on-the-ball contact in all of the below competitions.

	UEFA Champions League		Dutch Eredivisie		German 2. Bundesliga		Chilean Primera
	UEFA Europa League		Austrian Bundesliga		Spanish Segunda Liga		Colombian Primera
	English Barclays Premier League		Russian Premier League		Copa Libertadores		Mexican Primera
	Spanish La Liga		Portuguese Liga (75%)		Asian Champions League		Saudi Arabian Premier
	German Bundesliga		Belgian Jupiler League		Australian A-League		Chinese Super League
	Italian Serie A		Norwegian Tippeligaen		MLS		Qatar Stars League
	French Ligue 1		English SkyBet Championship		Brazilian Serie A		Turkish Süper Lig
					Argentine Primera		France Ligue 2

For each event logged we add a series of descriptors: a pitch coordinate, a player and team reference plus a time-stamp. These variables enable us to provide hundreds of statistics on where events occurred, which players were involved and when they took place, meaning that the detail and range of information on every ball contact is the largest available from any provider.

This level of detail means Opta data separates different types of pass, such as through ball, headed flick-on and long balls. We can tell which tackles were goal saving, from those which regained possession in the final third, or even what percentage of shots were left-footed volleys compared to diving headers.

We collect up to **2000 detailed events, live**, during every match in the competitions listed below.

Truly global coverage

Opta's Core Data feeds offer a more basic level of live information for **1000+ other football competitions** right across the globe.

For more information on Opta's Core Data feeds, please head to www.optasports.com.
